Mock Up Test BI/DA

VUSE PROGRAM

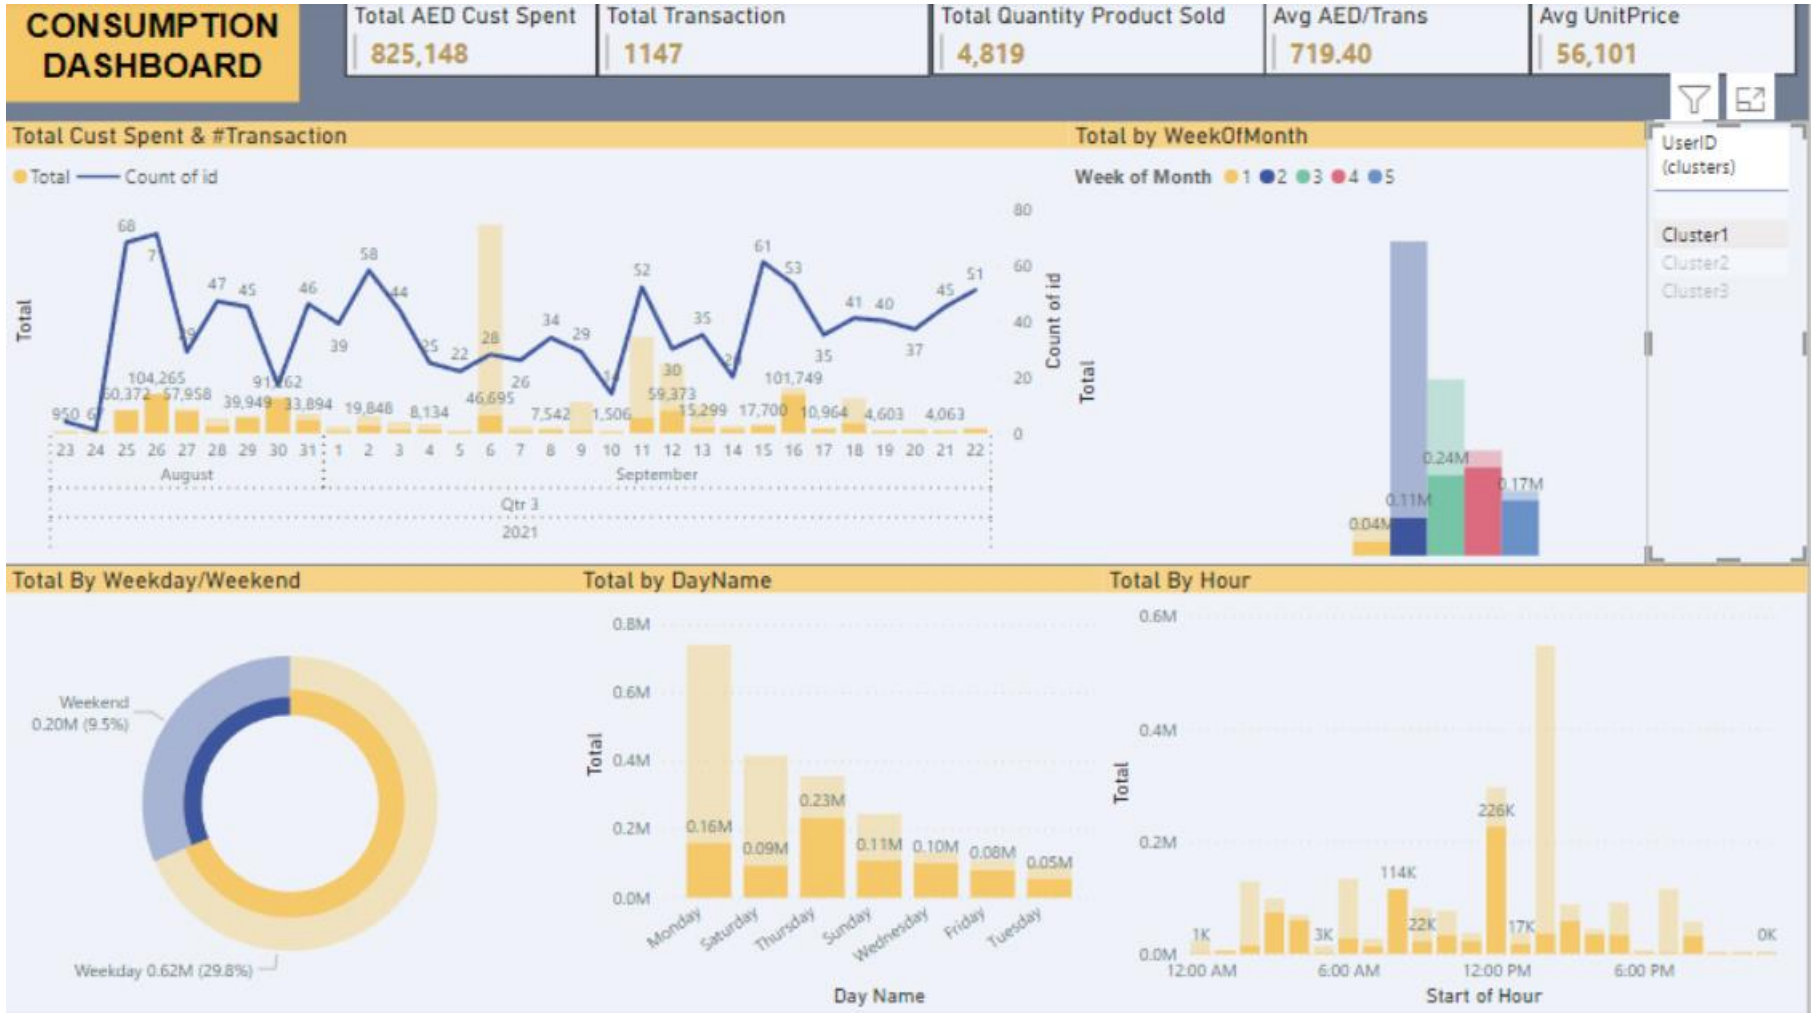

SEASONALITY

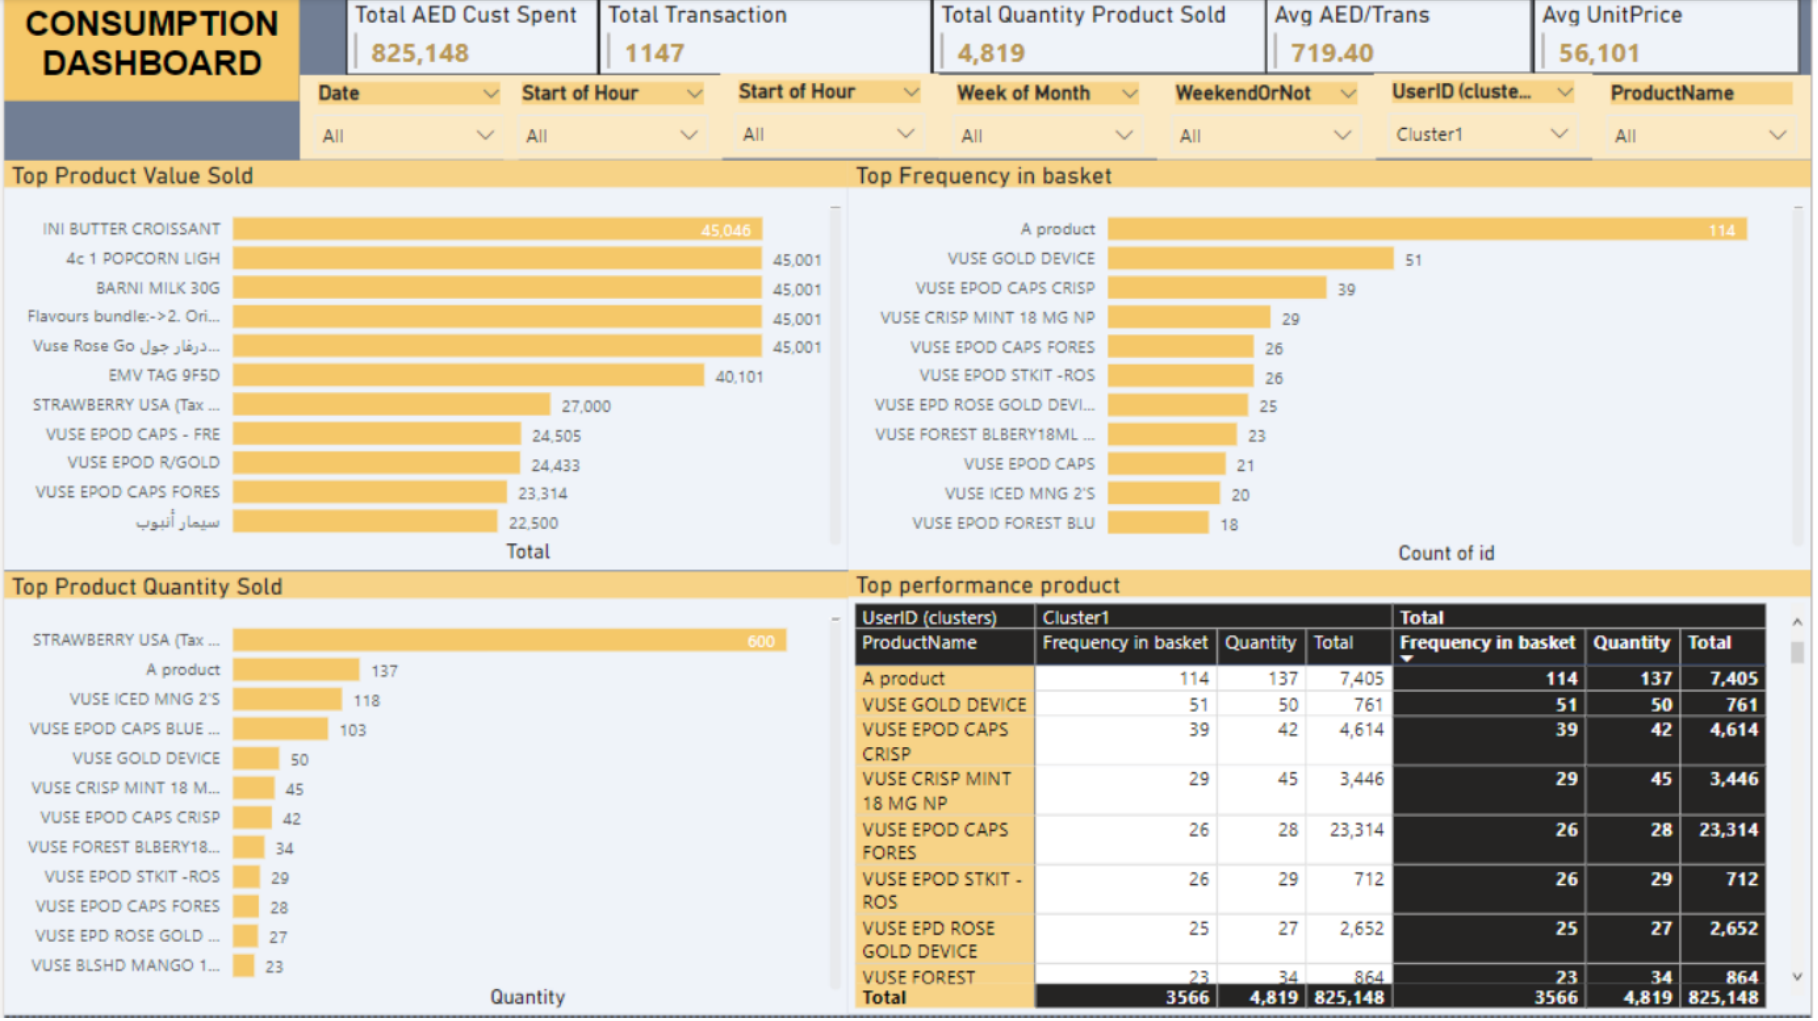

83% Revenue come within in 4 days: Monday, Saturday, Thursday & Sunday. Maximize the user engaging on these best-selling days for maximizing their purchase.

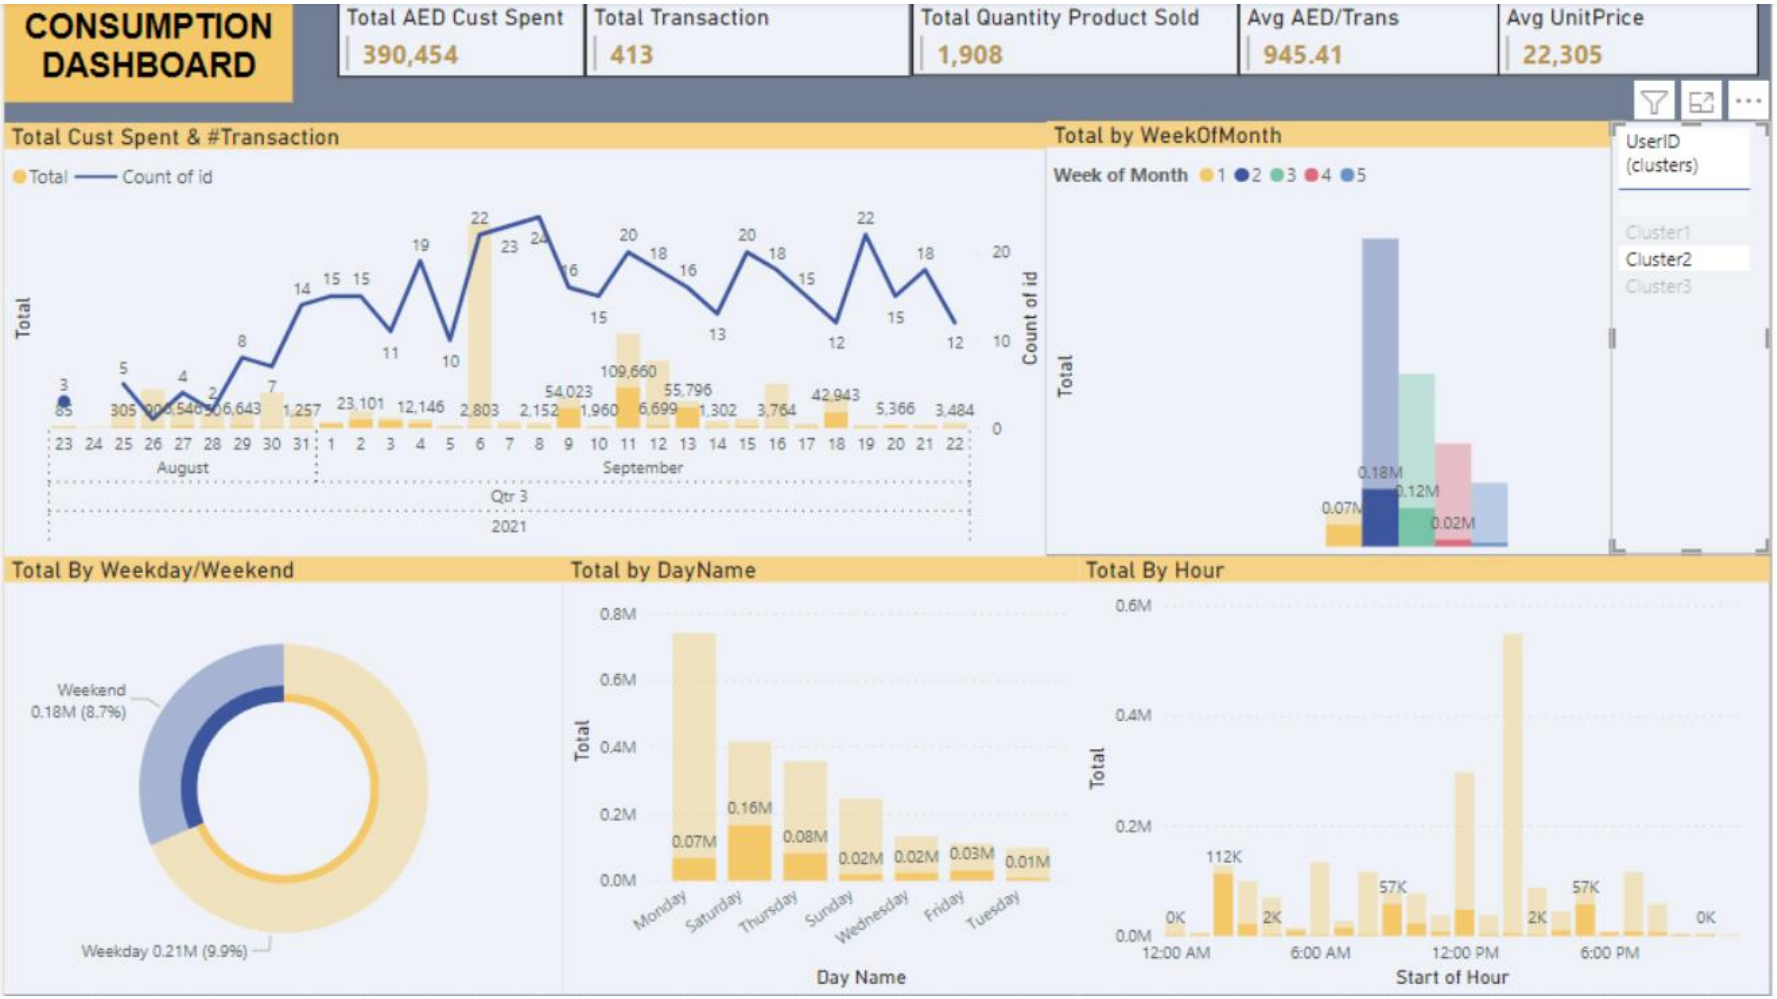

Peak hour is on 12pm & 2pm (within Mall operation hour). Other than that, it would be low peak hour. However, customer tends to buy from early morning till morning time when the store is not opening. That indicates users shop online on late mid-night till Mall opening time. Focus the promotion on online platform on 2am, 6am and 8am. (top 3-time frames)

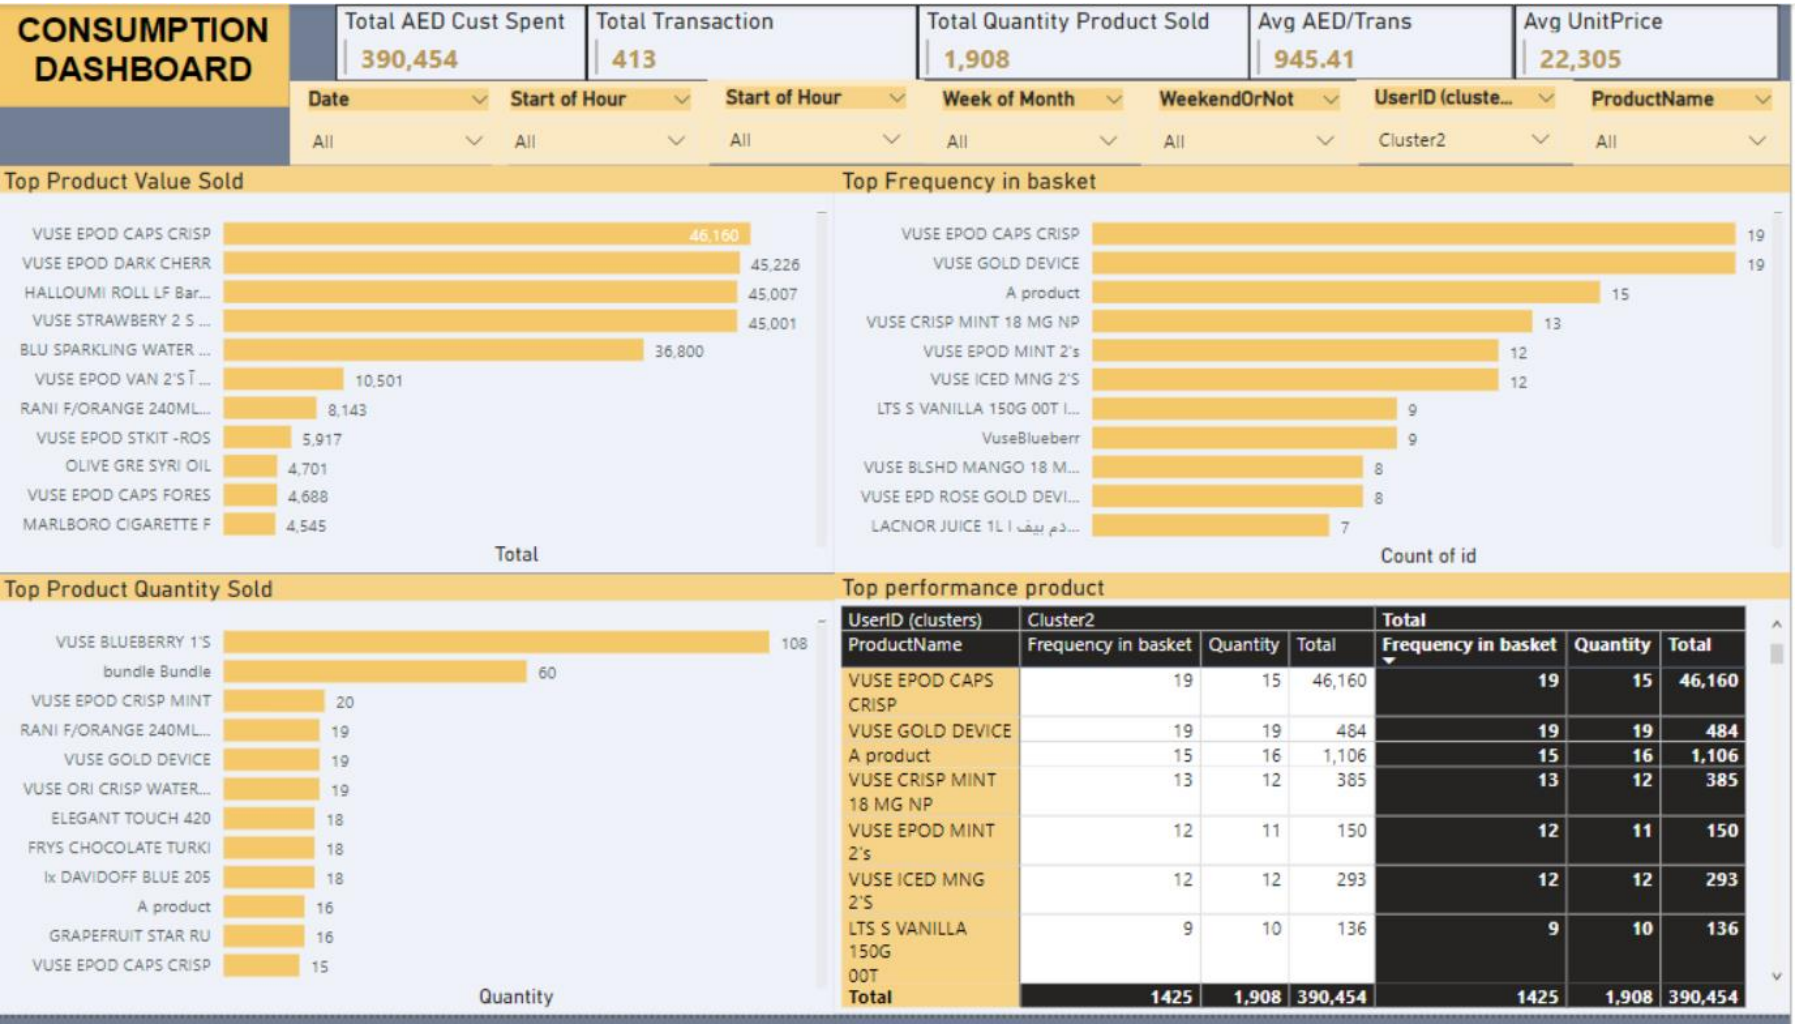

Cluster 1: They purchase generally all week. And they tend to buy the most on 12pm and 8am.

Here is the cluster 1 purchase. A product is the top frequency on their basket!

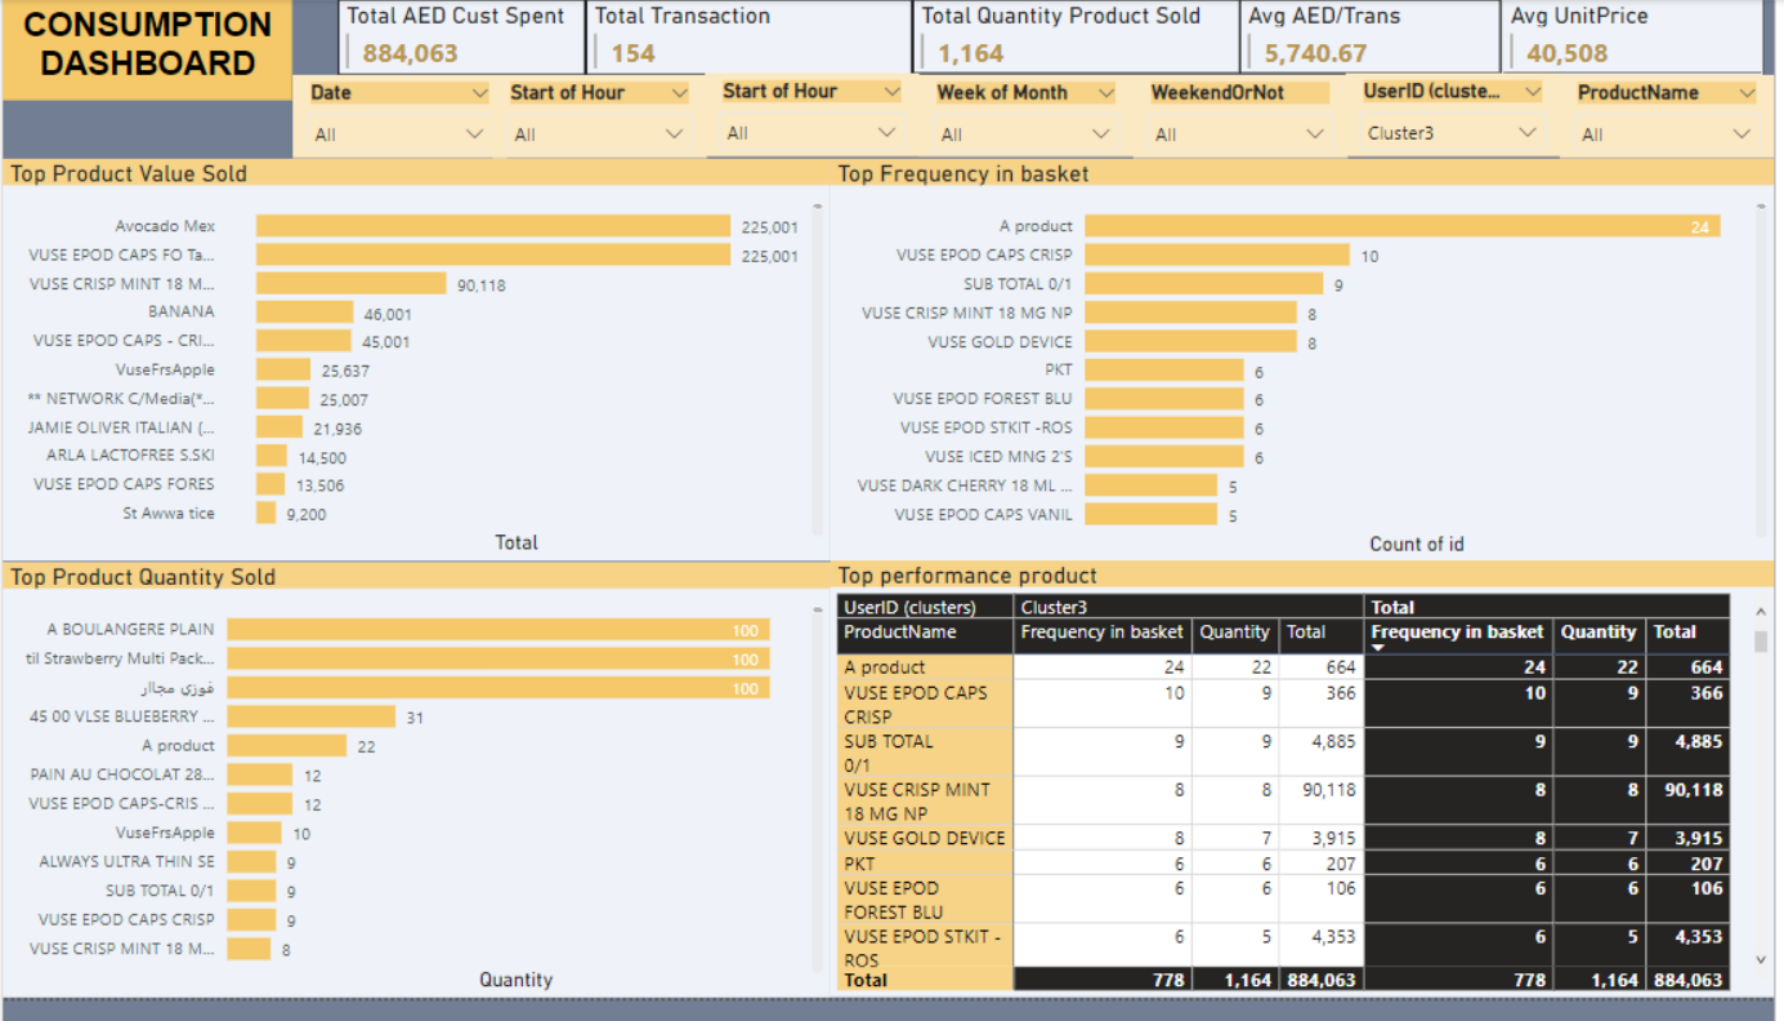

Cluster 2: they purchase mostly online (most likely), because they buy on 3am. The other 2-time frames are 9am & 6pm

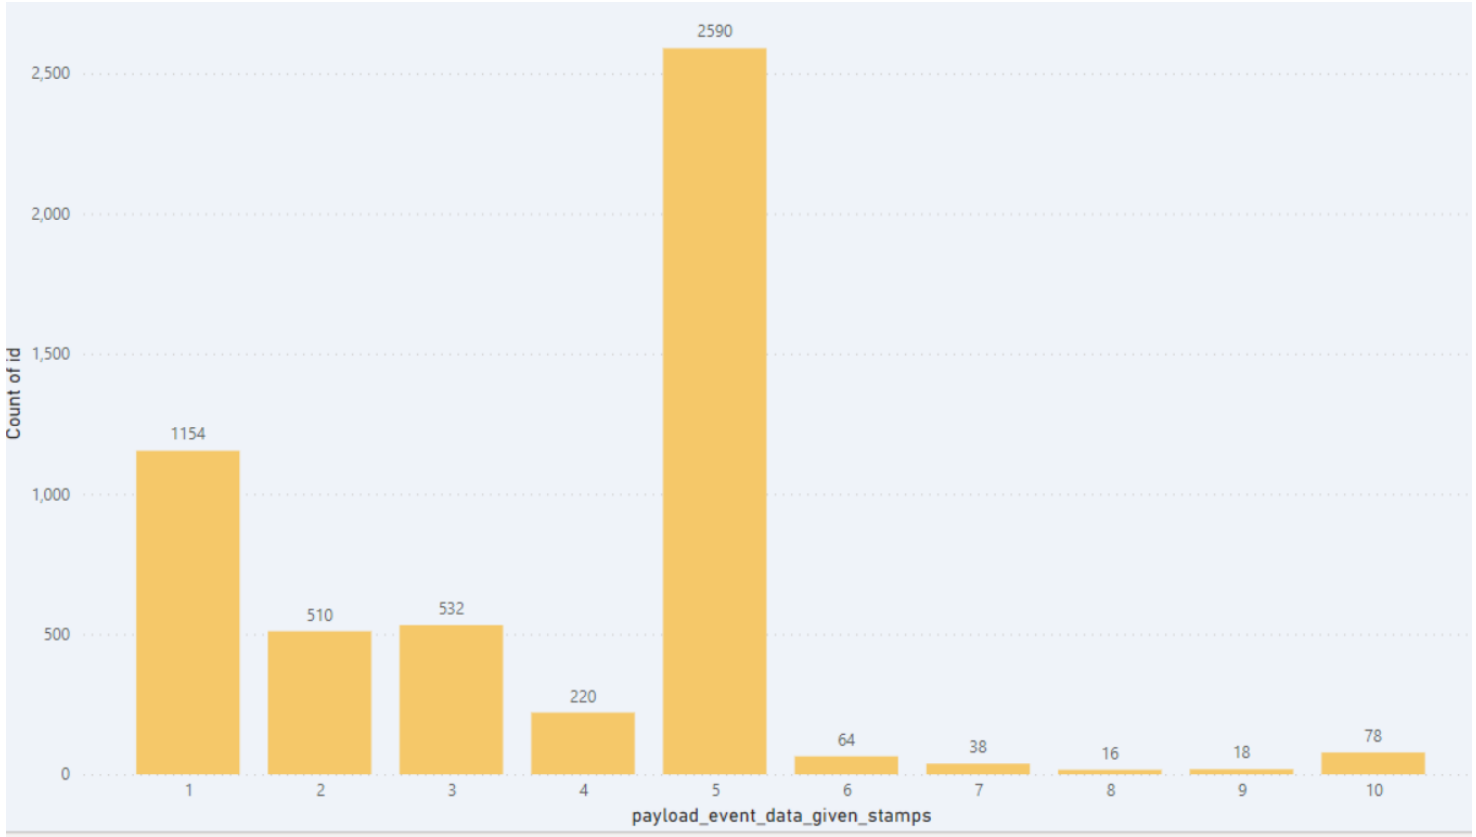

Cluster 2: they purchase EOP CAPS CRIPS and Gold Device! Sell them more to them these items

Cluster 3:They purchase on Mondays and most of the time is on 2pm. This group tend to buy in 3 time-frame: 6am, 2pm & 7pm

Cluster 3: This cluster is VIP one. They bought big basket size & value. Therefore, we should thoroughly tailor-made the promo and combination of product to them.

Our customer tend to acquire 1 & 5 stamps/time, it indicates that their transaction receipt either small or mid size.

Cohort retention:

- New customer count
- Percentage retention
- Average spend

Based on retention rate, the customer who on late Aug till early Aug has more chance to come back to us after 4 weeks and they also spend more compared to other users.

Conclusion

- Based on clusters of customer's behavior, we can customize the time frame, combination of product to their taste of shopping to us.

  Cluster 1 is almost new consumer, we could survey them how they know about us in order to understand our resources of new customer to boost the growth.

  Cluster 2 has already shopped a few times, give them regularly the promo on day, time and product they usually buy on email, app, sms to remind them upcoming week.

  Cluster 3 is VIP one. Give them more vouchers and phone calling them to catch them more in deep in customize production combo.

- Our customer tend to buy very low to medium transaction. Push the medium transaction behavior where they get 5 stamps/transaction. We could boost the revenue of the brand.

- We clearly see the late Aug & early Sep customers are the most loyal and value ones. That indicates our product is more meaning to their life. We can deep dive into the customer profile to understand why they gets value from our products.
