VENDING'S OPERATION CHANGE FOR A POSITIVE REVENUE GROWTH

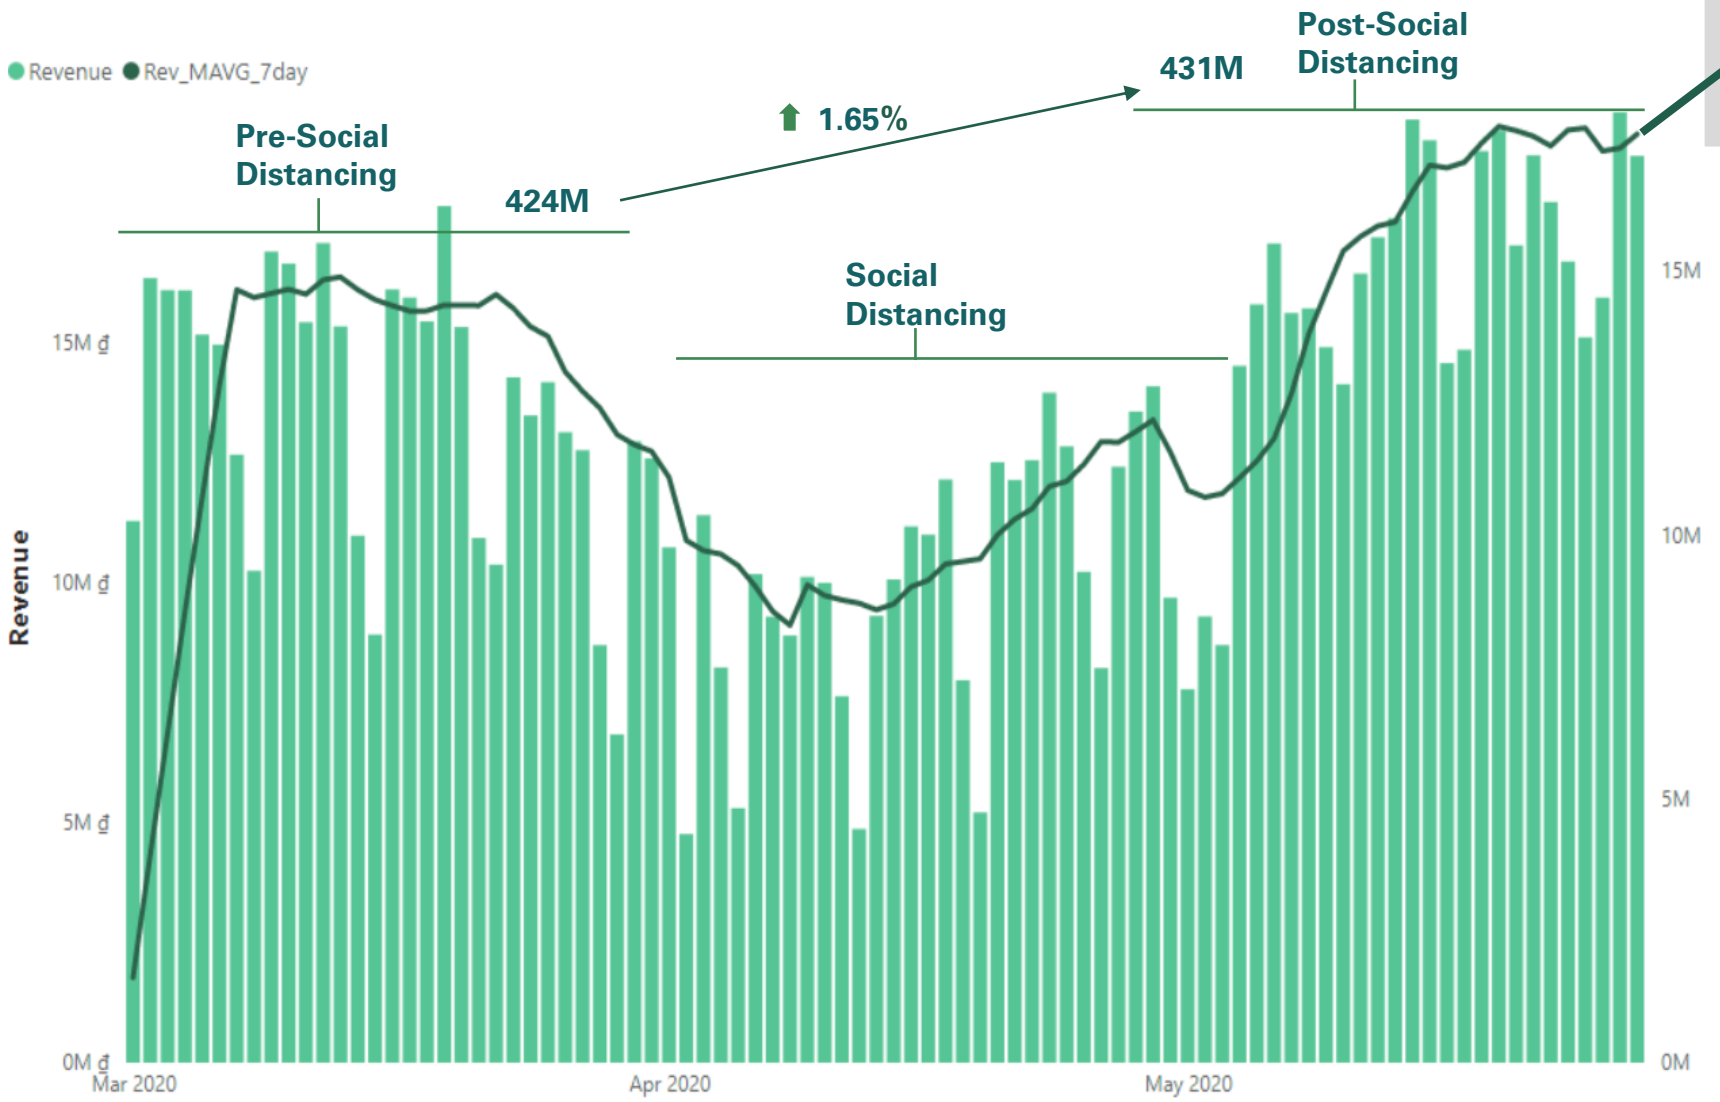

AFTER COVID-19's CITY LOCKDOWN PERIOD

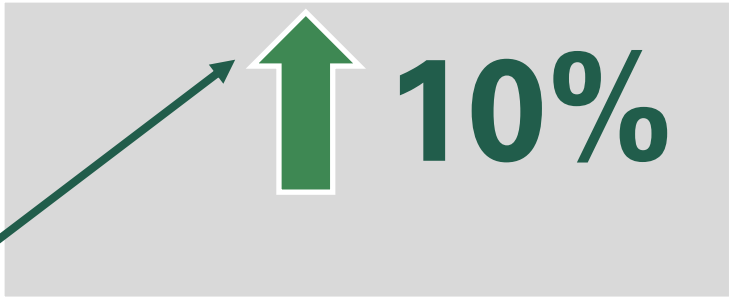

Problem break down for analytics

With the outbreak of COVID-19 along social distancing policy, the urge to change higher than ever to cover any loss during the lockdown. **10% growth rate is ACHIVEABLE!**

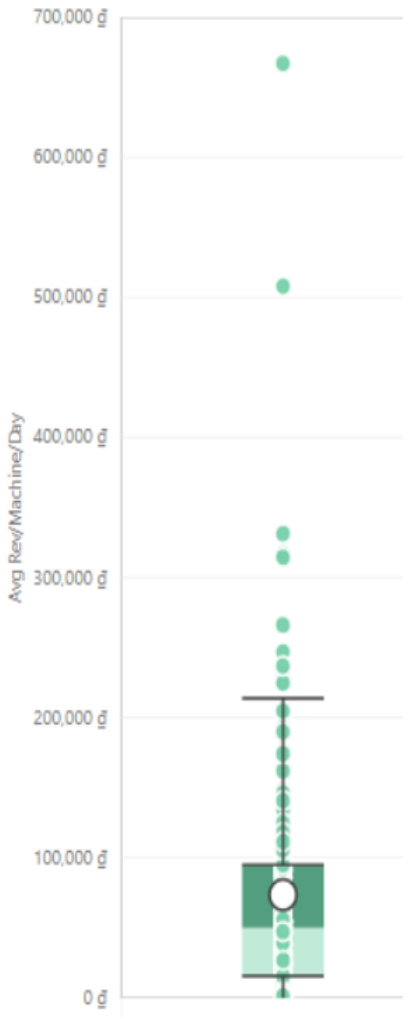

WHAT IS THE KEY DRIVER TO REVENUE's GROWTH?

The top performance vending machines sell more than 110.000đ/day that contributes 57% Revenue with 20% of total machine number. On the other hand, 21% bottom ones sell 10.000đ/day that contributes only 1% Revenue

80th percentile - 110.000đ/day

36 Machines contribute **57% Revenue**

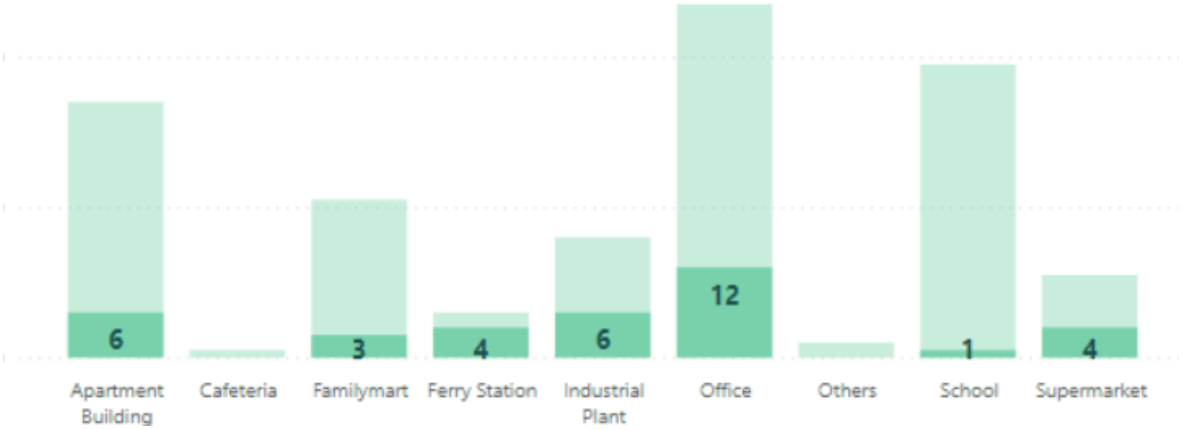

20th percentile - 10.000đ/day

38 Machines contribute 1% Revenue

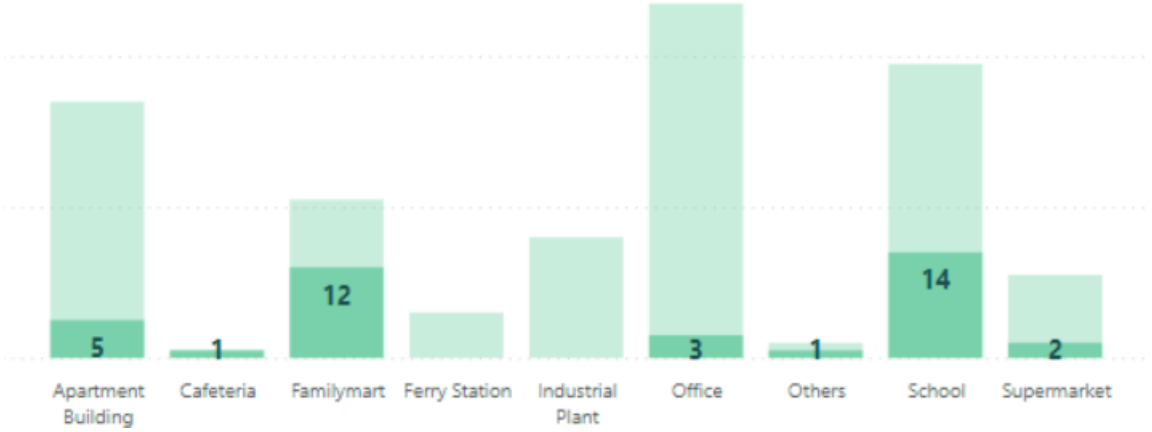

Familymart & School channels are in substantial LOW productivity because they only have 11% number of top scorer but have 68% on bottom scorers. There is an urgent need to relocate some vending machines from Familymart & School to potential locations.

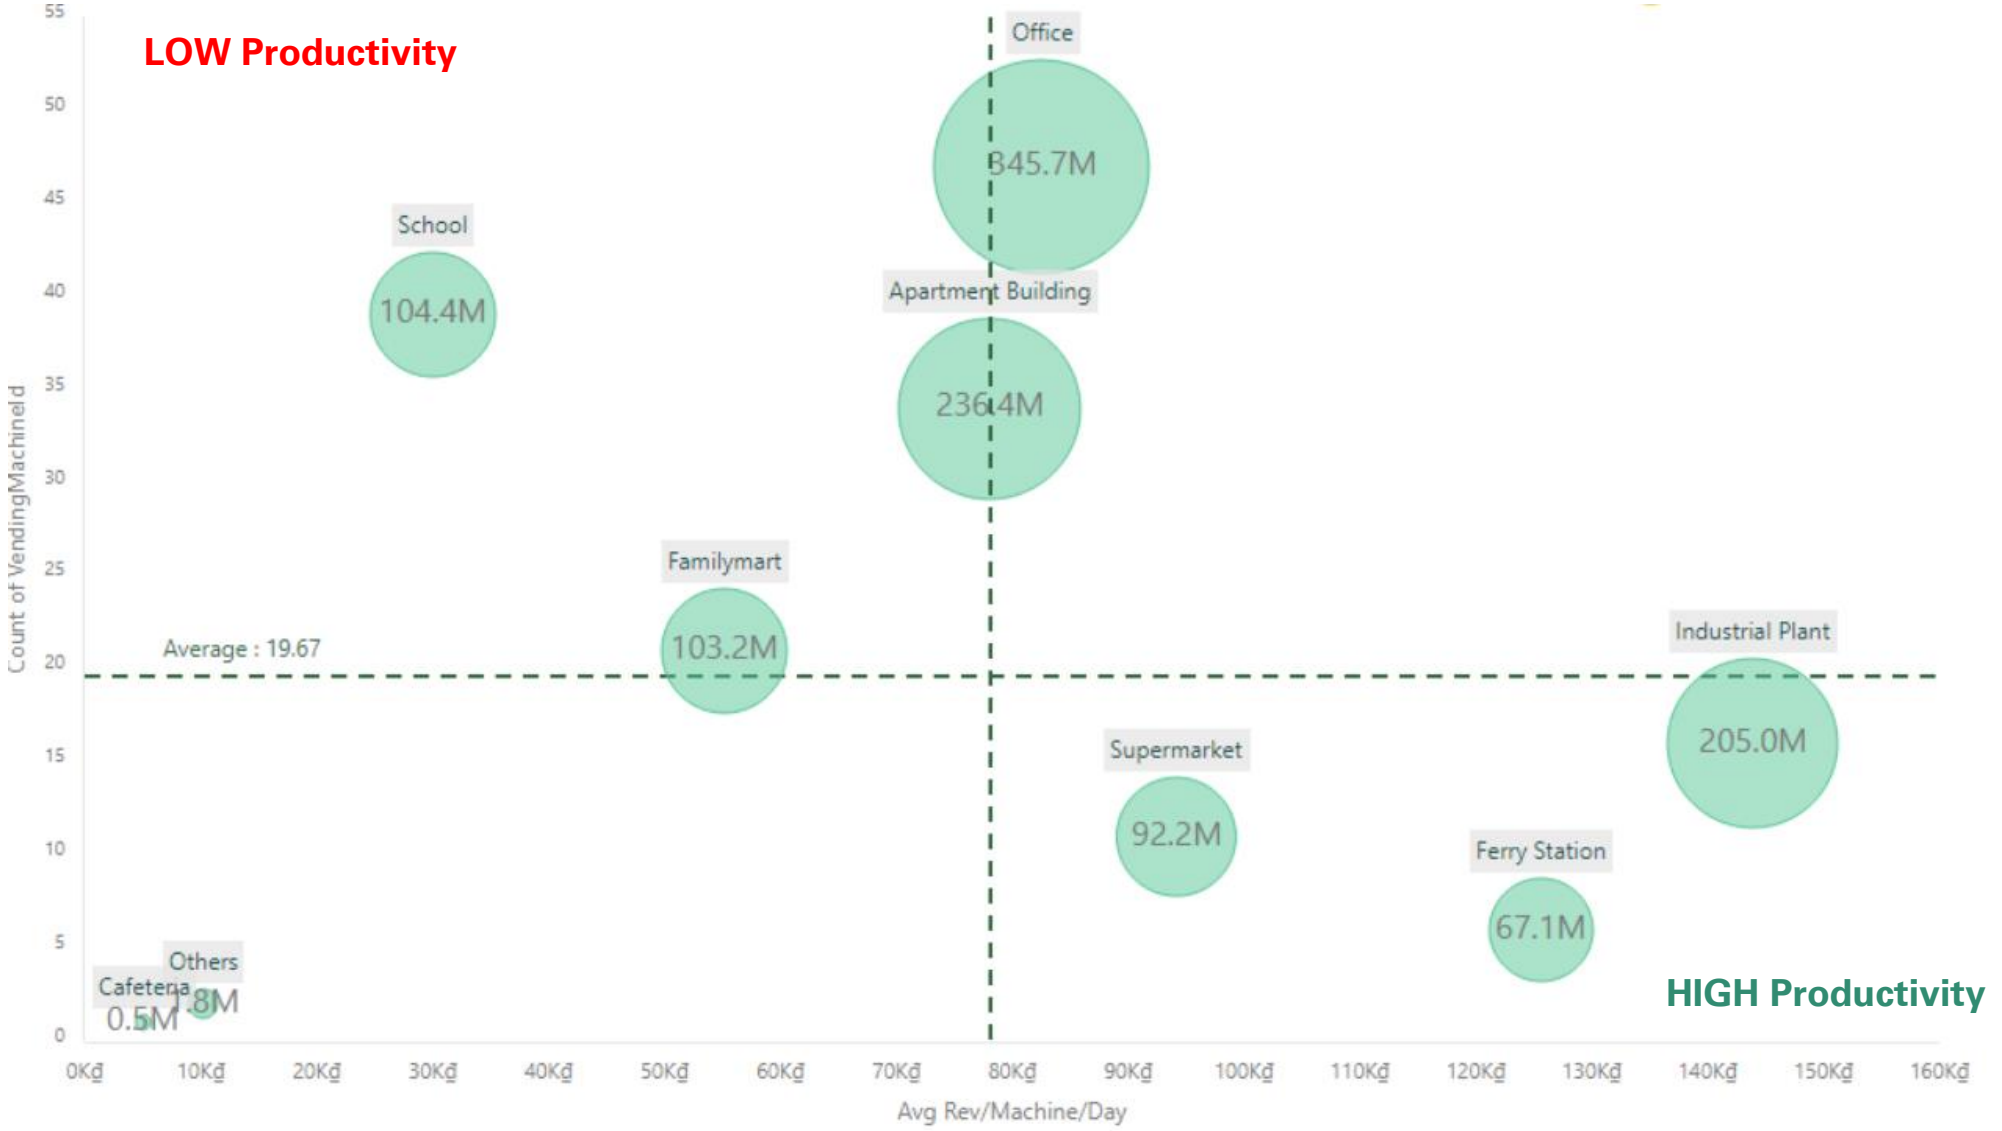

11% (4 machines) top productivity vending machines in School and Familymart

68% (26 machines) low productivity vending machines in School and Familymart

Vending's location matters in revenue generating. Schools & Familymart channels are in the low productivity quadrant where high number of machines but yield below 50th percentile of productivity. Supermarket, Industrial Plant & Ferry Station are in sweet pot.

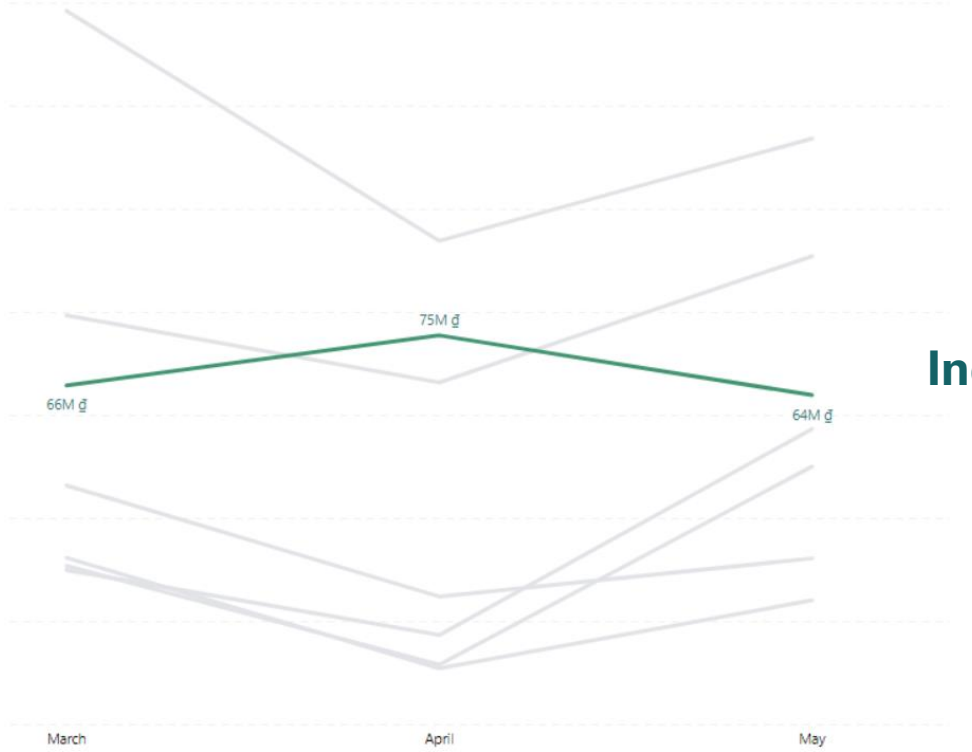

The first phase of relocation for the lowest 30% productivity vending machines with 12 machines.

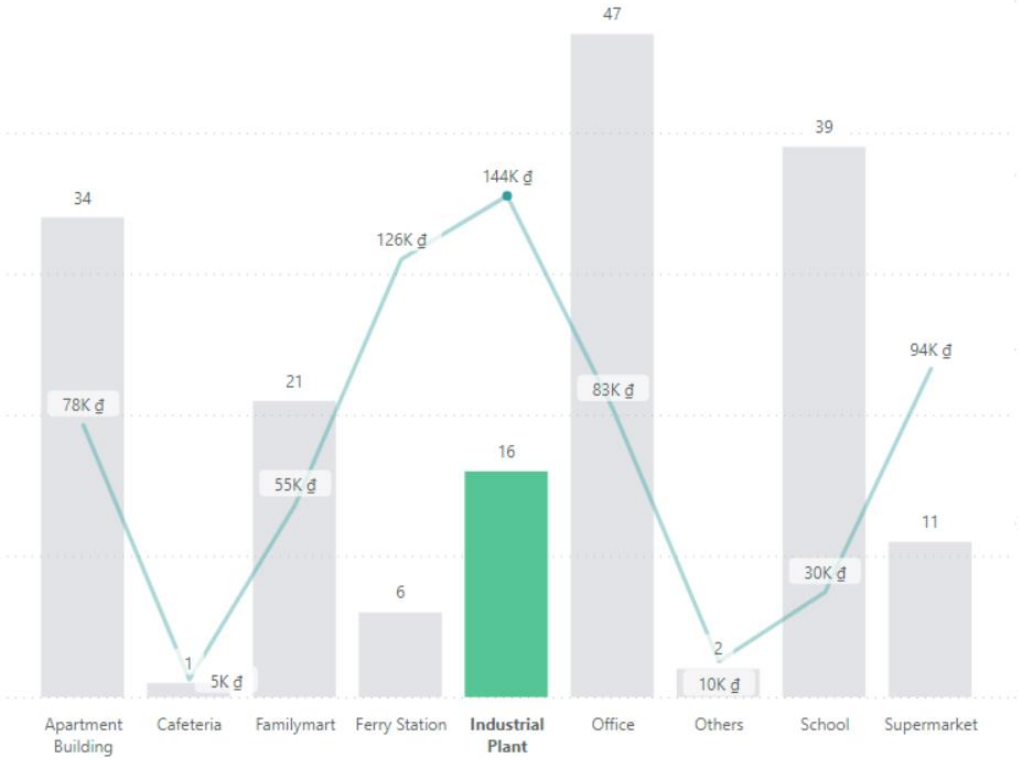

The relocation vending machine will ADD 42M to Revenue approximately 10% growth rate

Vending ID	Avg/Sale/Day	Revenue	Location type	Vending location name	District
24	236	21,000	Familymart	FAMILYMART	1
26	618	55,000	Familymart	FAMILYMART	1
46	854	76,000	Familymart	FAMILYMART	1

239	2,135	190,000	School	ĐH HỒNG BÀNG	Bình Thạnh

During social distancing of COVID-19, industrial plants still maintain the high traffic due to sleepovers policy. That make the increase in revenue in this channel. There risk of outbreak COVID-19 is highly tangibles. Therefore, relocating vending machine to this area is a good move and to cover up such a substantial loss in revenue in social distancing.

Industrial Plants

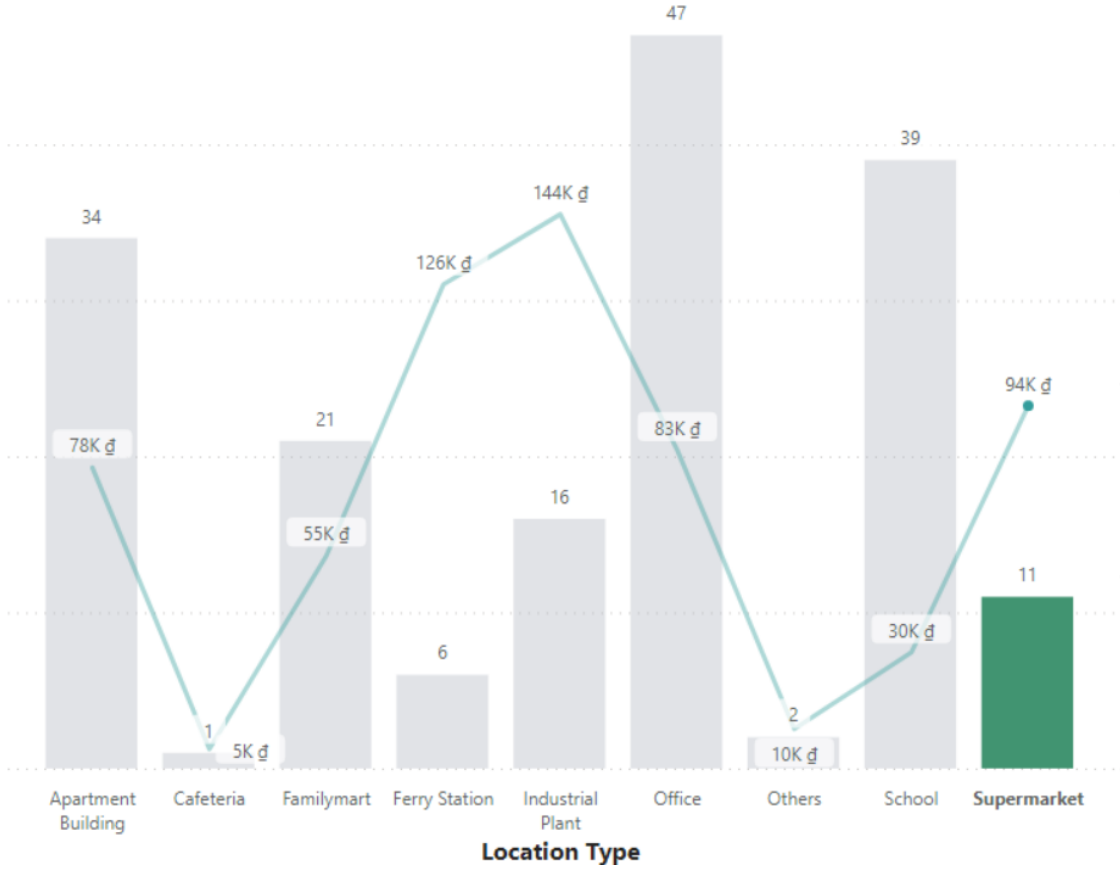

Phase 1 - Industrial plant adds 6 machines in district 7 (JUKI, Tan Thuan are top scorers) & 12 (Quang Trung software park) or any same character ones
***average productivity 144.00đ/machine/day * 6 * 30 days = 25.920.000đ**

The post social distancing, the Supermarket has the significant raise with MoM 200% and contributes for 11.58% Revenue. It would be a potential place to receive the second spot for this first phase.

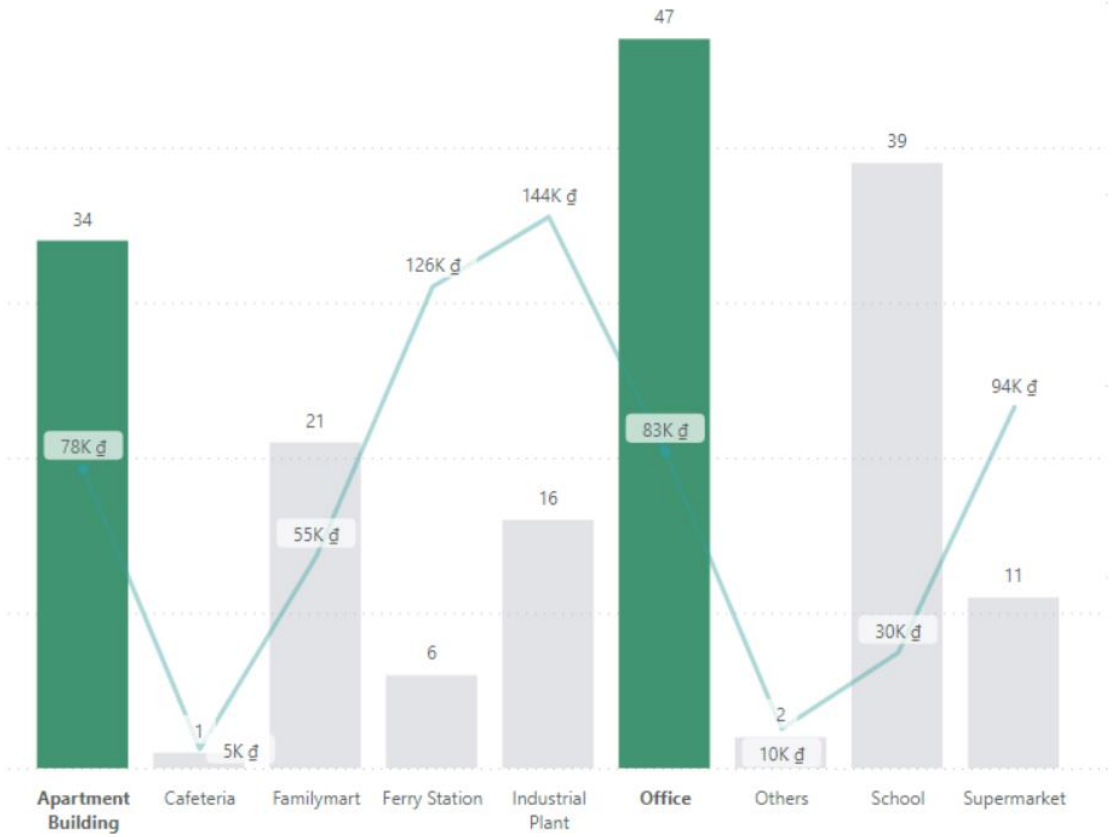

Supermarket

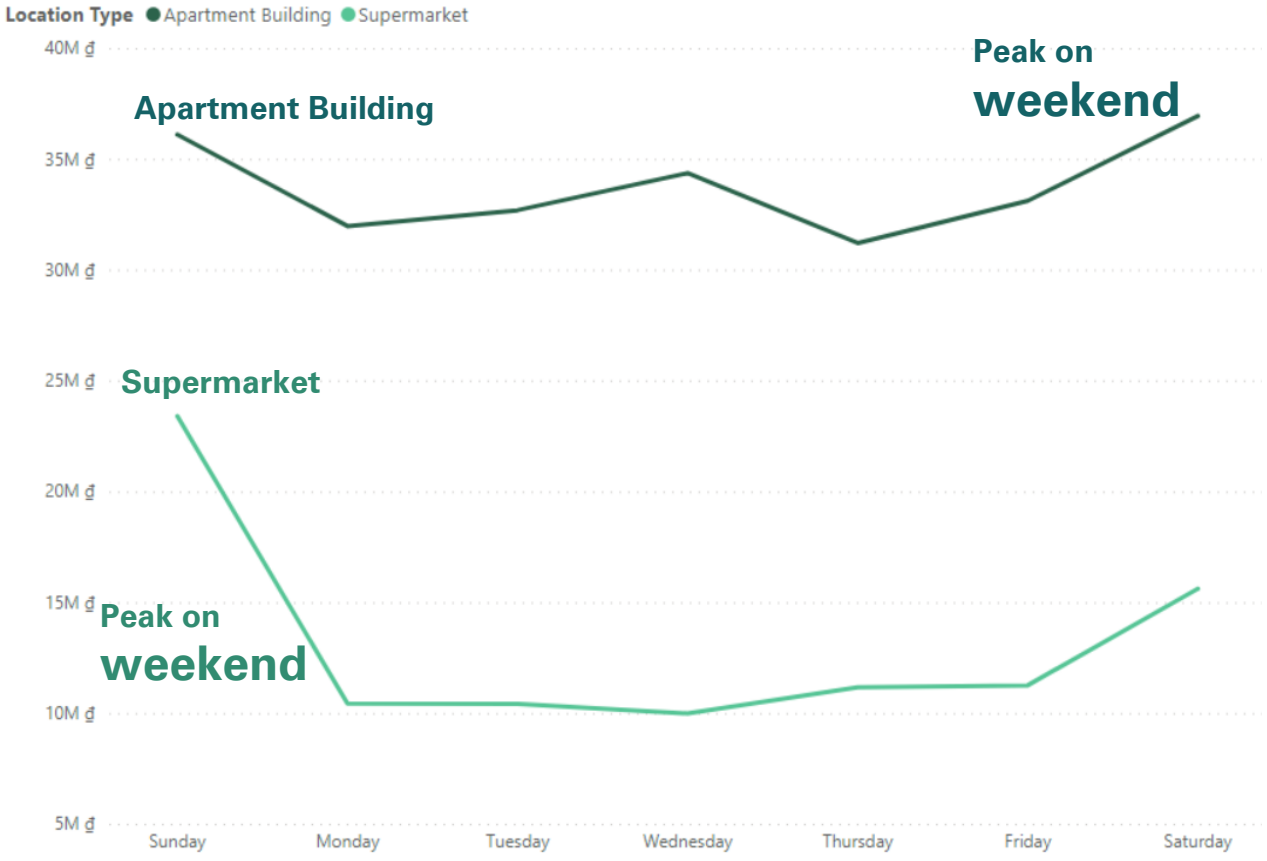

Phase 1, Supermarket adds 4 machines in AEON mall Binh Tan or shared characteristics supermarket
***average productivity 94.00đ/machine/day * 4 * 30 days = 11.280.000đ**

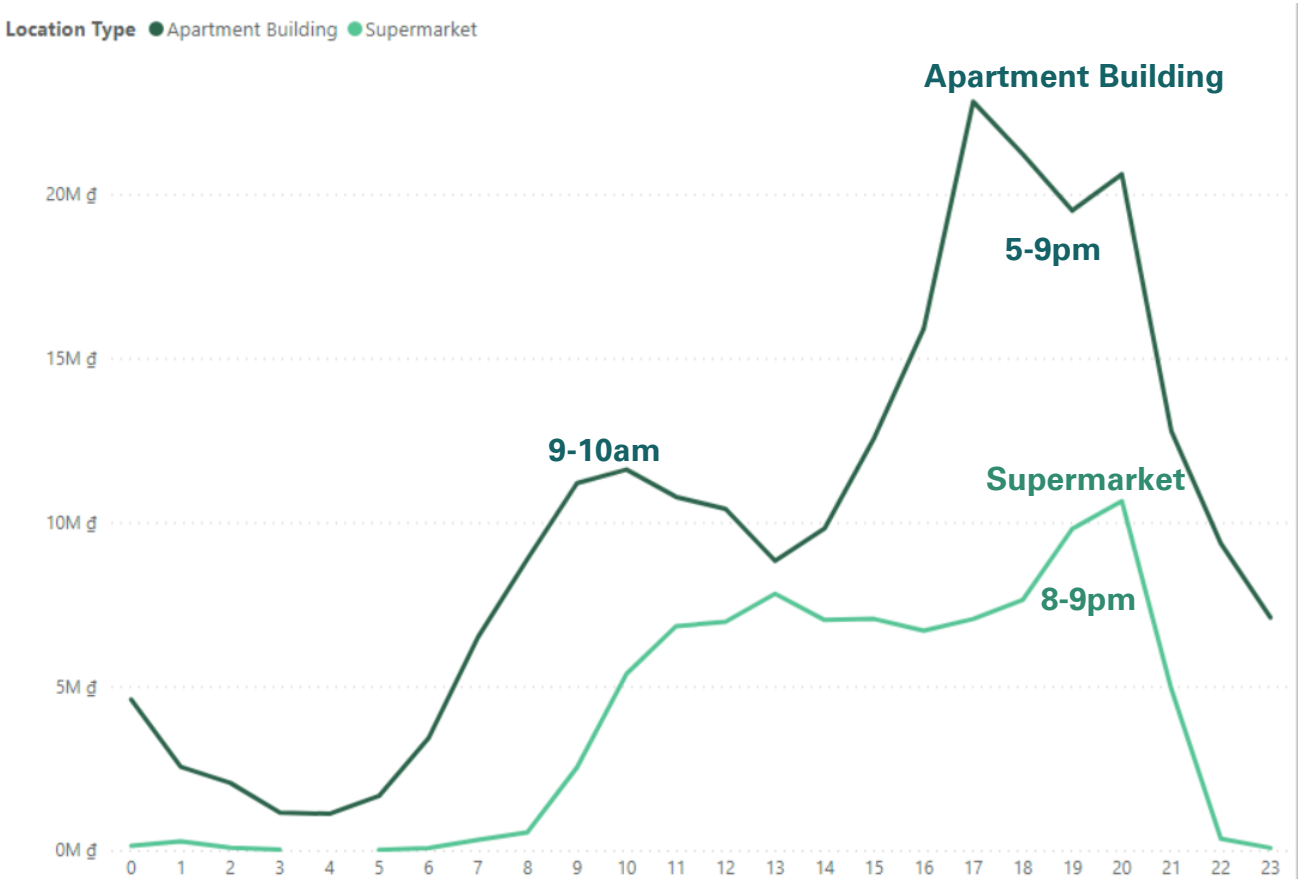

During 1st phase, Office and Apartment building add one addition machine each

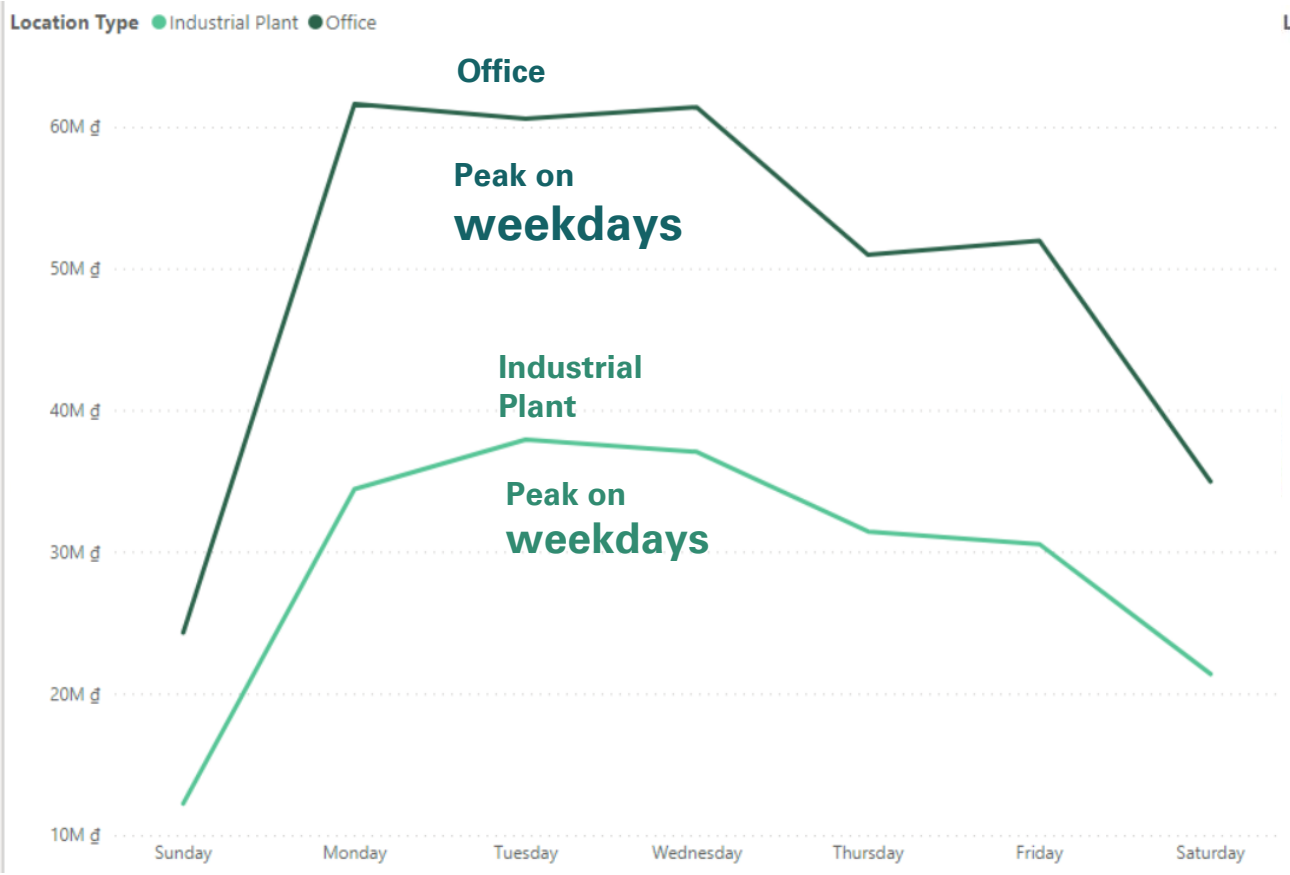

Phase 1 - Office adds 1 machine
***average productivity 83.00đ/machine/day * 1 * 30 days = 2.490.000đ**
Phase 1 - Apartment Building adds 1 machine
***average productivity 78.000đ/machine/day *1* 30 days = 2.340.000đ**

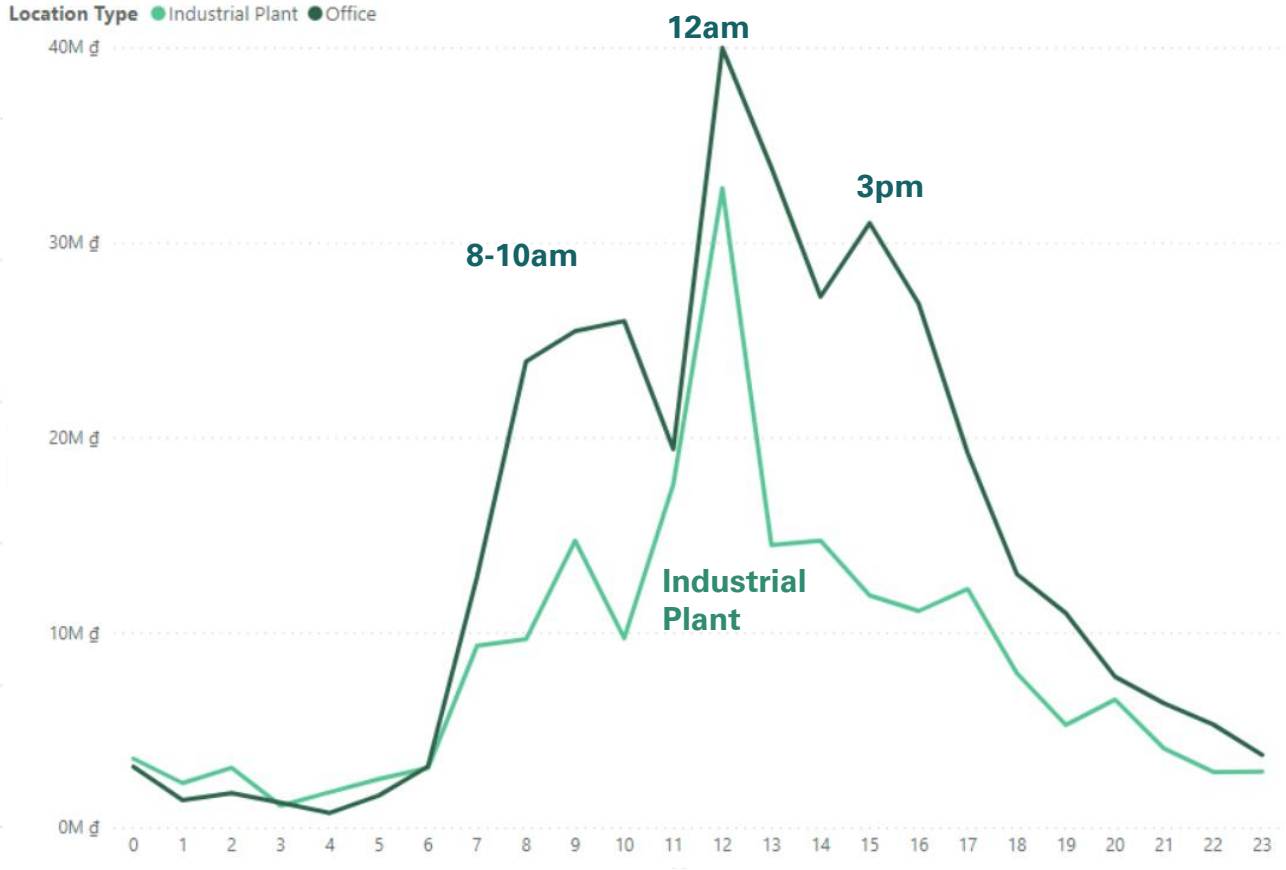

Focus on filling up products in different time frames and location types would maintain and increase the growth rate!

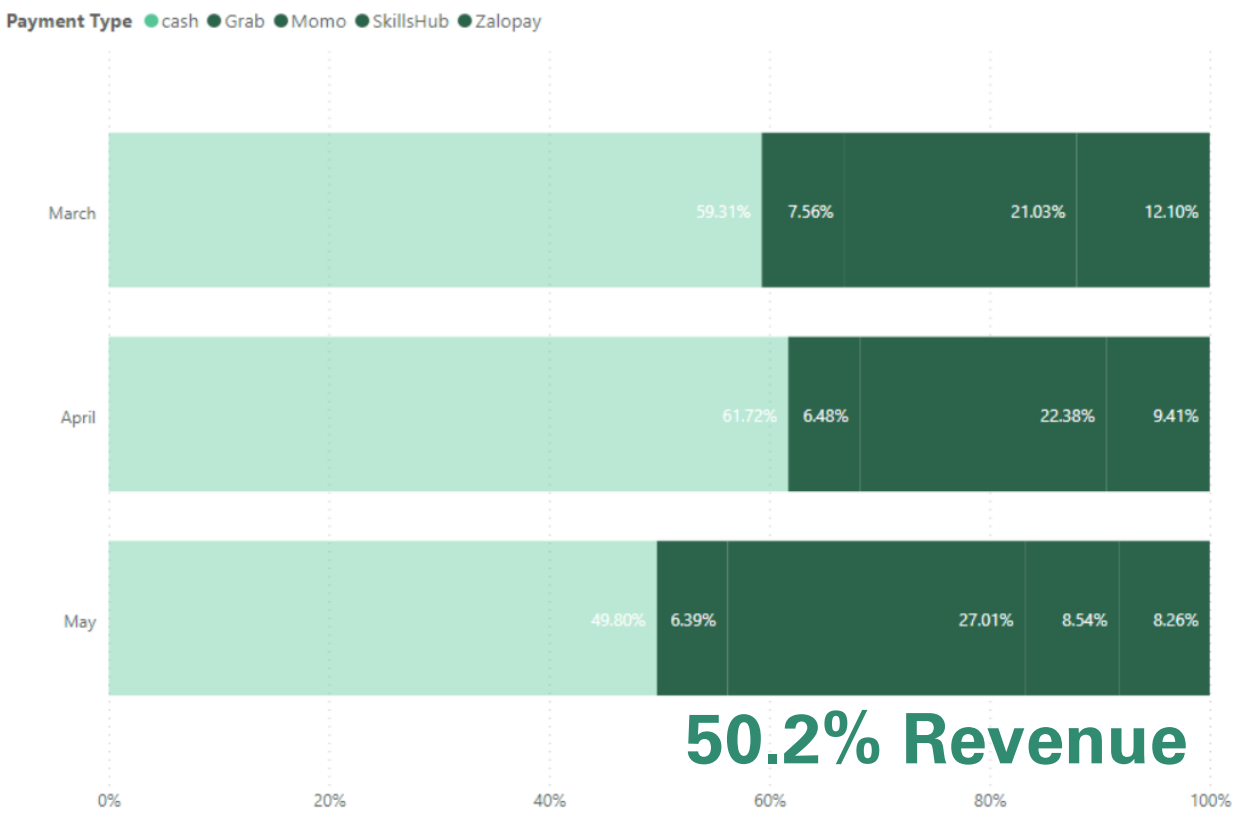

Focus on filling up products in different time frames and location types would maintain and increase the growth rate!

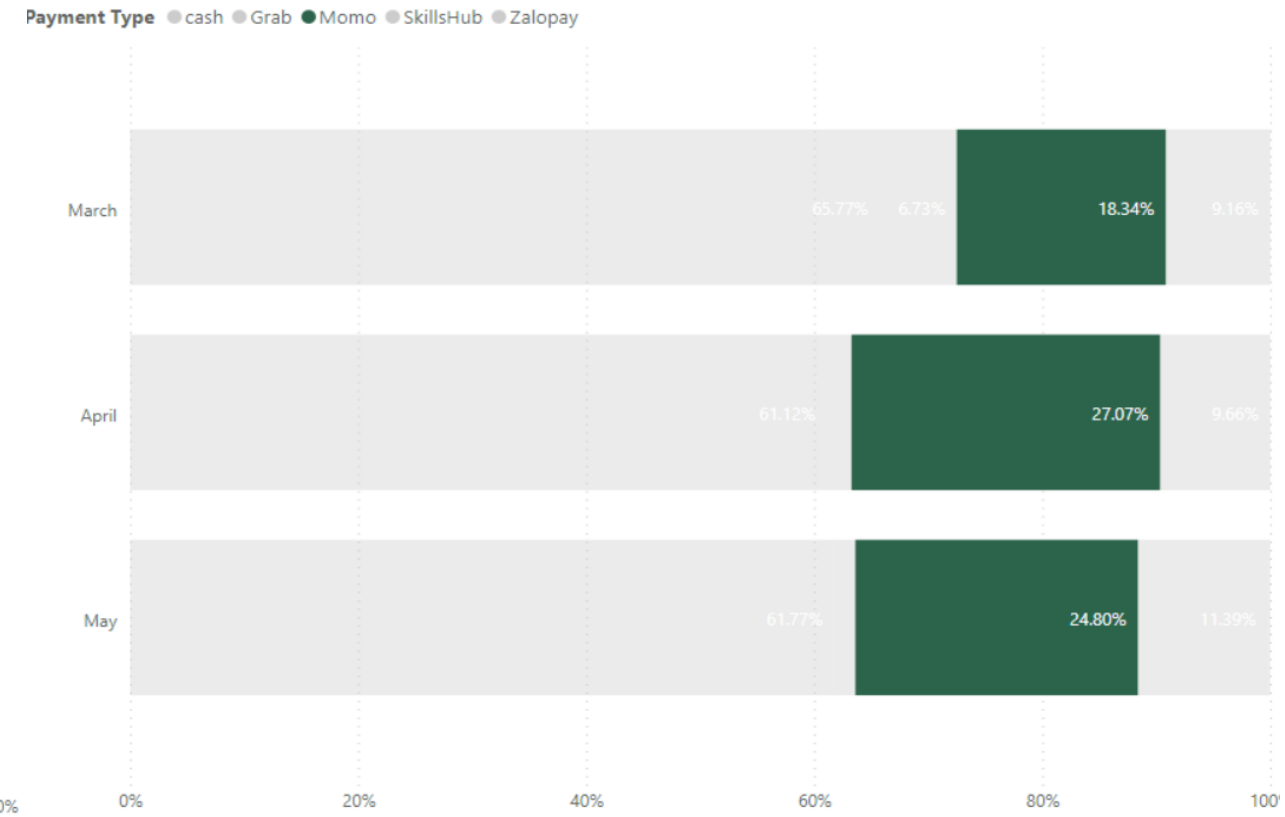

The payment by digital wallets is getting HIT with 50.2% total payment in Office during May.
